

Technical Report 18

PRELIMINARY OPTICAL DESIGNS FOR AN MMT UPGRADE:
A 256-INCH FILLED-APERTURE
OPTICAL/INFRARED TELESCOPE

Dr. Harland W. Epps
March 1986

An Invited Report to:

Dr. Frederic H. Chaffee, Jr., Director
Multiple Mirror Telescope Observatory

Dr. J. Roger Angel, Director
Steward Observatory Mirror Laboratory

CONTENTS

1. Introduction
 2. Choice of Primary Mirror and Wide-Field f/ratio(s)
 3. Optical Image Quality Criteria and Telescope Error Budget
 4. Development of a Wide-Field f/4.50 Corrector
 5. Description and Optical Analysis of the Baseline Wide-Field f/4.50 Corrector
 6. Decollimation Sensitivity of the Baseline Wide-Field f/4.50 Corrector
 7. Infrared Performance at f/45.0
 8. Development of a Narrow-Field f/9.00 Focal Expander-Corrector
 9. Description and Optical Analysis of the Baseline Narrow-Field f/9.00 Corrector
 10. Polishing and Testing the f/1.00 Primary and f/4.50 Secondary Mirrors
 11. Summary of Results
 12. Recommendations for Follow-On Optical Studies
- Appendix: List of Self-Documenting Illustrations
