

PRINTING FROM A MAC LAPTOP

How to connect to the HP2006n printer in the MMT0 control room from a MAC laptop:

- 1) Open the “System Preferences” > “Print & Fax” dialog, under the “Hardware” category.
- 2) Click on the “+” symbol below the list of printers to add a new printer.
- 3) Click on ‘IP’ tab
- 4) Enter the following IP address for the printer ‘Address’: 128.196.100.203 or use: hp2600
- 5) After the printer has been found, click the “Add ” button.
- 6) This printer should now be available for printing from your Mac applications.
